Krok : Fetlock of hindlimb LAT

105.40mm

This is a lateral radiograph of the fetlock joint of a hindlimb. The image shows the distal radius and ulna at the top, the carpal bones below them, and the metacarpal and proximal phalanx of the digit. The joint spaces are clearly visible. A scale bar on the right indicates a length of 105.40mm. The background is black, and the bone structures are white.

105.40mm

A lateral X-ray of a horse's knee joint, specifically in a hock position. The image shows the distal femur at the top, the patella in the middle, and the tibia at the bottom. The joint space is visible between the bones. A scale bar on the right indicates a length of 105.40mm. The image is in grayscale and has a high contrast.

Krok : Stifle DP

105.40mm

A lateral radiograph of a horse's stifle joint. The image shows the femur (thigh bone) at the top, the tibia (shin bone) at the bottom, and the patella (kneecap) in the middle. The joint space is visible between the bones. The image is in grayscale and has a slightly grainy texture.

LF

105.40mm

A lateral radiograph (X-ray) of a horse's hindlimb, specifically the fetlock joint. The image shows the distal end of the cannon bone (third metacarpal) articulating with the proximal sesamoid bone and the distal end of the third metatarsal bone. The joint space is visible, and the surrounding soft tissue structures are partially visible. A scale bar on the right indicates a length of 105.40mm.
