

## 01 Paard Aankoop protocol

**Executed for:**  
Smolders Sporthorses B.V

**Address:**

Netelsedijk 42  
5094 BD Lage-Mierde  
NL

Executed on:	07/02/2025
Name:	Dinky Toy Cs Z
Chip Number:	981100004657064
UEN Number:	056 015 Z55382119
Origin:	Don VHP x Graf Top
Sex:	O
Birthdate:	18/06/2019
Colour:	Bruin

## General and clinical examination

Conformation and stance:	Normal
Condition:	Normal
Skin and coat:	Normal
Mucous membranes:	Normal
Lymph nodes:	Normal
Eyes and eyelids:	Normal

## Respiratory system

Respiration at rest:	Normal
Type of respiration:	Normal
Spontaneous coughing:	Normal
Larynx sensitivity:	Normal
Respiration at exercise:	Normal
Abnormal sounds:	Normal
Laryngoscopy performed:	No
Laryngoscopy findings:	

## Circulatory system

Peripheral circulation:	Normal
Heart at rest:	Normal
Heart after exercise:	Normal

## Digestive system (external inspection)

Digestive system (external inspection):	Normal
Mouth, teeth, tongue:	Normal

## Urogenital system (external inspection)

Urogenital system (external inspection):	Normal
--	--------

## Nervous system

Nervous system:	Normal
Tail tone:	Normal
Correction reflexes:	Normal
Coordination:	Normal

This report is only valid if provided with a signature and general terms and conditions.

### Inspection, palpation and eventual percussion

Head	Normal
Neck:	Normal
Withers:	Normal
Back:	Normal
Croup:	Normal
Left frontlimb:	Normal
Right frontlimb:	Normal
Left hindlimb:	Normal
Right hindlimb:	Normal

### Hooves

Horn quality:	Normal	
Hoof percussion:	Normal	
Hoof shape:	Even	
Shoeing	Yes	Front
Type of shoeing	Normal	

### Flexion tests

Forced flexion:		Trotting after 1 minute flexion	
Left frontlimb:	Not sensitive	Left frontlimb:	Negative
Right frontlimb:	Not sensitive	Right frontlimb:	Negative
Left hindlimb:	Not sensitive	Left hindlimb:	Negative
Right hindlimb:	Not sensitive	Right hindlimb:	Negative

### Walk, trot and canter

#### Walking on hard surface

Straight line:	Not sensitive
Small circle on the left:	Not sensitive
Small circle on the right:	Not sensitive

#### Trotting on hard surface

Straight line:	Not sensitive
Small circle on the left:	Not sensitive
Small circle on the right:	Not sensitive

#### Trotting on soft surface

Small circle on the left:	Not sensitive
Small circle on the right:	Not sensitive

#### Cantering on soft surface

Small circle on the left:	Not sensitive
Small circle on the right:	Not sensitive

### Radiological examination performed

No                      Number of X-Rays                      27

This report is only valid if provided with a signature and general terms and conditions.

## Assassments of radiographs

Grading	Left	Right
Navicular bone	2	2
Fetlock joint	1	1
Sesamoid bones	2-3	2
Tarsal joint	1	1

Fragments	Remarks
Fetlock joint left frontlimb:	-
Fetlock joint right frontlimb:	-
Stifle joint left:	-
Stifle joint right::	-
Tarsal joint left:	-
Tarsal joint right:	-
Fetlock joint left hindlimb:	-
Fetlock joint right hindlimb:	-

## Radiological exam of other parts/extra findings

Right hoofjoint: fragment prosesus extensorius  
Fetlock left front: fragment distal of sesamiodbone

## Conclusion

Kind regards,

This report is only valid if provided with a signature and general terms and conditions.

#### Terms and conditions

*A prepurchase or sale examination gives only my personal assessment of the current medical condition of the horse. Linked is a type of risk assessment of medical problems that can happen regarding the use of the horse.*

This examination has several limitations:

- Each exam is a snapshot. Any horse can at one moment seem very healthy, or at another limping, showing heart murmurs or respiratory distress. This difference may be due to coincidence, occurred after injury or illness, changes in housing, whether or even drug camouflage prior to the exam.
- If the customer wants it, there is the possibility to include a blood sampling to detect illegal substances.
- It deals no obligation towards any results. The horse is examined in function of a client and the purpose for which the horse will be used. This exam and the standards used for it, can therefore vary between clients and horses. This report is therefore only applicable to no one else than the person stated on the report.
- The client agrees with the extent of the investigation, and realizes that this is always a compromise between risk-limitation and price for the exam. If for example an additional endoscopy or additional X-rays are desirable, this can be asked in advance or during the exam.
- The standards used in the radiographic examination can be different from those used by colleagues or universities and can differ between what is common in different countries. There are only those findings indicated that I believe are important. Deviations that I believe have no interest are not mentioned. Example: fragments at the distal border of the navicular bone (with or without a recess in the navicular bone itself), ossification of the hoof cartilage, etc.
- Since this exam is no research addressing the capabilities of the horse as a riding or sporthorse... Neither is it a valuation of the horse.
- It cannot clearly demonstrate whether the horse might have had surgery or other treatments, such as repeated infiltration of the joints, colic surgery, ... Hence it is the sole responsibility of the purchaser to cover himself here.
- It is also the sole responsibility of the purchaser to cover himself in terms of stable vices such as: crib biting, wind sucking, weaving ...
- The buyer must be aware that some diseases are seasonal, so they may not be present at the time of the inspection. (for example summer itch, headshaking, ...)
- About this aspect he must cover himself as well.
- If the buyer wants to insure the horse, he will have to wait before buying it, until he has the approval of the insurance company. A test conducted by myself, is not automatically an approval for an insurance company. They may have different standards.
- This exam gives you no advise as a future stallion, because the standards used for this can be vary between the different studbooks.
- It is also the buyer's full responsibility to receive the full ownership papers included the "mutatie luik" of the horse.

This report is only valid if provided with a signature and general terms and conditions.
